What Each Document Derives From

01 — Problem Statement

- **Source:** Business analysis, stakeholder interviews, operational data
- **No upstream dependencies** — this is the root document
- Describes the current state, business problem, impact, and consequences

02 — Business Objectives & Success Criteria

- **Source:** Approved Problem Statement (01)
- Translates the business problem into measurable objectives
- Defines KPIs, baselines, and targets

03 — Project Scope

- **Source:** Problem Statement (01), Business Objectives (02)
- Defines what is in/out of scope based on the problem and objectives
- Lists major deliverables, assumptions, and constraints

04 — Stakeholder Register

- **Source:** Problem Statement (01), Business Objectives (02), Project Scope (03)
- Identifies who is affected by or can influence the project
- Maps interest, influence, and engagement strategy

05 — RACI Matrix

- **Source:** Project Scope (03), Stakeholder Register (04)
- Assigns Responsible, Accountable, Consulted, Informed roles
- Maps activities to stakeholders from the register

06 — Initial RAID

- **Source:** Problem Statement (01), Objectives (02), Scope (03), Stakeholders (04), RACI (05)
- Identifies Risks, Assumptions, Issues, Dependencies
- Uses all prior documents to surface what could affect the project

07 — Project Charter

- **Source:** All Initiation documents (01–06)
- Consolidates approved information into an executive-ready document
- Serves as the single reference for project authorization

08 — Approval Authorization

- **Source:** Project Charter (07)
- Formal sign-off gate

- Authorizes the project to proceed to Planning

Validation Rule

A document cannot be approved until all documents it depends on are approved.

01 approved → 02 can be approved → 03 can be approved → ...
